INTRODUCTION

As businesses are challenged with continuous disruption, leaders are required to be increasingly agile as they guide their organisations through these disturbances. This advanced programme is designed to increase the agility of leaders and provide them with the skills they need to effectively implement strategic transformation in a manner that embraces technology and innovation.

OVERVIEW OF THE HIGH-LEVEL PROGRAMME

Module 1: Agile Leadership
Module 2: Agile Strategy Management
Module 3: Leading Agile Organisations
Module 4: Design Thinking
Module 5: Customer Experience

ELECTIVE MODULES (TWO TO BE SELECTED)

- Fintech
- Leading Agile Teams
- Financial Accounting
- Business Acumen for Leaders

OUTCOMES

- Develop strategies for reflection and self-awareness while focusing on personal improvement as an agile leader.
- Analyse the role agility plays within strategic management, and how to apply these concepts during disruptive times.
- Create an agile culture within your organisation to lead change, innovation and digital transformation in a rapidly changing world.
- Apply the fundamental principles of design thinking to reframe a problem, identify solutions and create a prototype to test the best idea successfully within a business environment.
- Gain a clear understanding of the importance of customer experience within an ever changing, digitally transformed, environment.

**Advanced Certificate in Agile Leadership
(SAQA ID 122981, NQF Level 6)**
