INTRODUCTION

In a world increasingly shaped by rapid technological advancement, organisations across all sectors are rethinking how they operate, compete, and deliver value. The AI & Digital Evolution Programme is designed to provide professionals with a comprehensive understanding of the key technologies, systems, and frameworks that are driving this change and reshaping the global digital landscape.

This forward-looking programme blends foundational insights with deep dives into emerging technologies, ensuring participants are equipped not only to understand but also to strategically engage with the challenges and opportunities presented by digital transformation. Whether you are part of a technology team, strategic leadership, risk management, or regulatory affairs, this programme will empower you to navigate and lead within the evolving digital ecosystem.

OVERVIEW OF THE HIGH-LEVEL PROGRAMME

Module 1: Introduction to Digital Transformation
Module 2: Digital Systems in Financial Markets
Module 3: AI, Robotics and Automation in the Financial Markets
Module 4: Cybersecurity and the Digital Evolution
Module 5: Blockchain and Digital Assets
Module 6: Technology Risks in a Digital Age
Module 7: Regulatory Frameworks for the Digital Age

OUTCOMES

1. Understand and assess the key technologies driving digital transformation in financial services, including AI, blockchain, and automation.
2. Identify and manage emerging risks related to cybersecurity, technology infrastructure, and digital innovation.
3. Navigate and apply evolving regulatory frameworks designed to support responsible digital growth in the financial sector.
4. Evaluate the impact of digital systems and emerging technologies on financial markets, operations, and customer experience.
5. Develop strategic approaches to implementing digital solutions that enhance efficiency, compliance, and competitive advantage within financial institutions.
