IQBBA International Qualification Board for Business Analysis

CERTIFIED FOUNDATION LEVEL

BUSINESS ANALYSIS

Certified by the International Qualification Board for Business Analysis (IQBBA)

Method
Online

INTRODUCTION

The Foundation Level certification is designed for business and system analysts, requirements engineers, product owners, and product managers who have basic experience in solution concept, design, or development. This entry-level qualification offers a comprehensive understanding of essential rules and standards in business analysis.

Graduates of the Foundation Level certification will be eligible to progress to the advanced training course, the IQBBA Certified Advanced Level Business Analyst. Key topics covered include the core principles of business analysis, as well as the role of innovation and design in creating a competitive advantage.

OVERVIEW OF THE HIGH-LEVEL PROGRAMME

- Fundamentals of Business Analysis
- Strategy Definition
- Management of Business Analysis Process
- Requirements Engineering in Business Analysis
- Solution Evaluation and Optimisation

OUTCOMES

Enhanced Business Analysis Skills: Participants will gain a strong understanding of business analysis principles, tools, and techniques, enabling them to effectively contribute to projects and drive business value.

Standardised Knowledge: Graduates will be equipped with a solid foundation in the common rules and standards used in business analysis, ensuring consistency and alignment across teams and organizations.

Career Advancement Opportunities: Completing the Foundation Level certification opens the door to advanced qualifications, such as the IQBBA Certified Advanced Level Business Analyst, fostering career growth and leadership potential.

Increased Innovation and Design Understanding: The programme emphasizes the role of innovation and design in developing competitive business solutions, helping participants enhance their ability to contribute to creative problem-solving and strategic decision-making.

INTERNATIONAL EXAMINATION

The exam (40 multiple-choice questions with a duration of 60 minutes and 75 minutes with extra time) is available as an online or paper-based examination.
